

PATENT OF THE WEEK

Fire extinguishing device and method

David Murray Munson Jr., on behalf of FOI Group LLC, has obtained U.S. Pat. No 7,121,354 for an improved fire extinguisher. The fire extinguisher is positioned near the fire and is activated in response to the heat from the fire. The extinguisher includes a reservoir of fluid which, when heated by the fire, pushes out fire-fighting material held in a second reservoir onto the fire.
